

Featured Symposium:  
The Two-Way Street Linking Amyloid, Tau,  
and Neural Activity

Co-Chairs

Michela Gallagher, PhD  
Johns Hopkins University, Baltimore,  
MD, USA  
Founder, AgeneBio, Inc., Baltimore,  
MD, USA

William J. Jagust, MD  
University of California, Berkley, CA,  
USA

## Symposium Sessions

### **Effects of Synaptic Activity on A $\beta$ and Tau from Preclinical In Vivo Studies: Similarities, Differences, and Implications**

David M. Holtzman, MD

### **Age-Related Network Dysfunction: Contributions of Neural Activity to Risk for Late Onset AD**

Michela Gallagher, PhD

### **Tau Accumulation in Clinically Normal Older Adults Is Associated with Increases in Hippocampal fMRI Activity**

Willem Huijbers, PhD

### **Neural Activity Revealed with fMRI Is Related to Beta-Amyloid and Tau Deposition in Healthy Aging**

William J. Jagust, MD
